

# **Blackboard Integration**

### Learning Management System Course Evaluation Connector

The Blackboard integrations for Class Climate make it more convenient for students and instructors to access their course evaluations from their Blackboard home page. The integrations are available as a Learning Tools Interoperability (LTI) connector, and a Blackboard Block.\*

Together, Class Climate and Blackboard work to increase student response rates and to encourage honest feedback.

The **student portal** provides each student with a list of their open online evaluations.

Each survey opens in a new browser window. After students complete a survey, the window displays which evaluations they have completed and which are pending, so they can complete all their evaluations at once.

The **instructor portal** provides a list of each instructor's classes, showing the evaluation response rate and providing access to the most current results report.
