VividForms Designer for EvaSys®

Create sophisticated questionnaires using your company's design

If you need more sophisticated forms design than the built-in VividForms Editor, VividForms Designer can expand your design options. This add-on module helps you create templates that match your organization's look and feel, while still incorporating pre-defined or custom questions, scales, and other design features. Use forms designed with VividForms Designer in any EvaSys evaluation or survey, making it easier than ever to get exactly the look you want.

Require more sophsticated forms design?

VividForms Designer provides advanced design tools, such as multi-column or other custom formatting and layout, landscape orientation, increased graphics libraries, page templates, and much more.

You can adjust text to place questions exactly where you want them (above, below, or next to the response choices) and control pole label placement more closely.

In addition, you have access to additional question types, section dividers, question groups so you can avoid repeating scales for every question, and other tools to make your design match your most sophisticated survey needs.

Want your forms to match your institution's branding?

VividForms Designer adds a variety of graphics tools, including line drawing, logos, text blocks, and much more so you can more closely match your branding look and feel.

Need to work offline?

It's easy with VividForms Designer. Simply purchase the add-on module and download the tool right from EvaSys. You can work whether you're logged in or not. You can even have more than one form open at a time, to increase consistency across surveys.
